

VERSION: 1.9

PRODUCT DESCRIPTION:

The DF-A0111 is a wideband compact DF antenna appropriate for use with the Watson Watt method. It can also be used in 3 or 2-channel correlative systems.

The antenna uses primarily Adcock type arrays, and incorporates a patented high sensitivity hybrid loop-Adcock topology for the lowest frequency band to maintain high sensitivity for its size. Each band offers an omni-channel output that can also be used for monitoring.

Band switching is done by a switch integrated into the antenna. An on-board wideband noise source is provided to allow for downstream RF channel calibration. An on-board electronic compass is provided.

Communication to, and control of, the antenna is provided by means of RS485 interface. Band switching can also be accomplished via direct differential pair switching for higher speed if needed.

20 – 6000 MHz

Product Code: DF-A0111

SPECIFICATIONS:

Product Codes:		
DF-A0111	Compact Adcock DF antenna with	
	integrated band switch	
DF-A0111-01	Compact Adcock DF antenna	
Electrical: DF		
Frequency range	20 – 6000 MHz	
Band B	20 – 700 MHz 1	
Band C	500 – 2000 MHz '	
Band D	1500 – 6000 MHz 2	
Channels per band	3	
DF method	Watson-Watt or 3-channel CIDF	
RMS large signal accuracy	Refer to graph below	
Polarisation		
Omni-output	Yes (utilised for Watson Watt estimation)	
Nominal input impedance	50 Ω	
Electrical: band switch (DF-A0111 only) and CAL switch (DF-A0111-01)		
Frequency range	20 – 6000 MHZ	
Control	 RS 485 serial at 115 kbaud two switching lines, each a differential pair 	
Switching time	< 100 µs using serial commands	
	< 4 µs when using dedicated lines	
Integrated compass	Available on RS485 serial. Accuracy 2	
Stored Information	Model no., serial no., user data fields	
	RF chain calibration using integrated holse	
(DF-A0111 only)	source or external applied signal	
Power supply		
Power consumption	< 1 w (noise source and compass on)	
Intorfação		
Electrical	Connectors recessed into base of antenna	
	DF_A0111 DF_A0111_01	
Antonno outputo	2x N tuno fomalo	Ov TNC fomale
Antenna outputs	3x N-type female	9X TING Terriale
Control and nower		in connector
Control and power	Flange for vehicle mast or shelter mounting	
Mechanical	י ומוועכ וטו יכוווטכ, וומגו טו גוופונפו וווטעוונווע	
Mechanical:		
Dimensions (@ x h)	320 mm x 690 mm	
Total mass	8.5 kg	
Environmental: designed to meet the following specifications		
Wind survival	160 km/h (without ice)	
Temperature (operation)	-30 °C to +70 °C	
Vibration and shock	Designed to MIL-STD-810-F for ground vehicles	
Water proofing	IP65 rain proof	

* Improved accuracy is possible using correlative methods

Notes

Optimum band change-over frequencies to be chosen by user after measurement. 1. 2.

Some degradation of accuracy using pure Watson Watt estimation can occur from 5.5 - 6.0 GHz (can be corrected using correlative methods or correction table) RMS accuracy is measured over all azimuth, over each full band. Individual frequencies may exceed this

3. figure.

*CA Application 2,853,219;

*EP Patent 2771943;

*U.S. Patent No. 14/353,382;
