PRODUCT DESCRIPTION:

The OMNI-A0306 is a high-powered antenna designed for vehicle applications in the 100 to 6000 MHz frequency band. The antenna may be used at frequencies as low as 80 MHz if a higher VSWR and lower gain can be tolerated.

The fibre glass radome is equipped with spring mounting to allow whip-action and resistance to impacts and obstructions.

Band A is groundplane dependent and a ground strap is provided to aid with grounding. Bands B, C and D are ground plane independent.
